

# 4 channel relay module

## Relay control board with optocoupler

## Features:

**4-channel relay output modules, relay output contacts 250A 10A. Input IN1, IN2, IN3, IN4, the signal line LOW effective. VCC, GND power input, can relay a separate power supply relay power input of JD-VCC.**

## Uses:

- 1, support all MCU control;
  - 2, the industrial sector;
  - 3, PLC control;
  - 4, smart home control;
